

# VUE Simplifies the NIPR's Compliance Clearinghouse

VUE Software offers a configurable platform that can quickly modify infrastructure to execute distribution and sales strategies. Backed by over 26 years of insurance industry experience, VUE provides flexible, configurable solutions that improve efficiency, reduce costs, and increase revenue.

NIPR is a unique public – private partnership that supports the states and NAIC to streamline and equalize the licensing and appointment process for regulators, the insurance industry, and the consumers they protect and serve.

## NIPR GATEWAY

## SOME OF VUE'S INTEGRATED ADDED BENEFITS

### Licensing

- Resident Licensing
- Non-Resident Licensing
- Renewals

- Imports electronic data from HR
- Supports e-signature
- Collects and tracks NIPR data and warehouse collateral materials
- Automates background checks, if required
- Integrates into fingerprint scheduling systems
- Finalizes producer contracts
  
- Automates submission of NRL licenses when all requirements are met
- Automates tracking of exceptions and rejections
- Continuously monitors licenses approvals
- Reports eligibility
  
- Tracks renewals and expiration dates
- Automates electronic submission of renewal applications
- Confirms and loads PDB alerts and databases when licenses are approved
- Provides bulk renewals and fee tracking

### Appointments

- Appointing
- Pre-Renewal Appointment Processing
- Terminations
- PDB Sync

- Imports data from the onboarding process
- Supports e-signature
- Pulls PDB data to verify and load license information
- Syncs data from NIPR to VUE
- Updates state rules weekly
- Automates configurable notifications
  
- Tracks appointment expiration
- Produces reports by production
- Reconciles renewal invoices
- Automates alerts
  
- Automates notifications in accordance with state rules
- Submits termination transactions to the NIPR
- Provides bulk termination of producers and appointments
  
- Pulls and stores ad-hoc producer data
- Automates loading of CSR / CAR reports
- Automates workflow of PDB synchronization for onboarding, additional appointment, and license renewals

## Work-Management Functions

VUE provides specific, configurable workflows and reports for end users with one click synchronization to NIPR and PDB with task and activity tracking.
